# ROBUST GDP GROWTH EXPECTATIONS FOR CEESE

According to growth forecasts, CEESE continues to outpace the euro area in 2025 and 2026

- Although industry in key countries of the region – such as Poland, Czechia, Slovakia, Hungary and Romania, which have strong ties to Germany – continues to struggle with the weakness of German manufacturing, growth in those countries is still being driven by strong private consumption, thanks to robust real wage increases and tight labour markets
- Among EU-CEE, Poland remains the frontrunner in terms of GDP growth, with 3.5% both this year and the next
- EU members of CEESE are still expected to grow around three times faster than the euro area in 2025, and in 2026 twice as fast (2.8%) as the euro area (1.4%)
